1. Index of Titles of Papers, Books Reviewed, etc.

About This Issue. (Editorial). 42
A Criterion for Determining the Number of Groups in a Classification. 115
Adaptive Information Processing. 36
A Formal Approach to File and Data Base Design. 28
Algorithms and Complexity; New Directions and Recent Results. 76
Algorithms for the Computation of Mathematical Functions. 78
An Overview of Programming Practices. 61, 101
A Practical Method of Comparing Bureau Costs. 3
A Relational Data Base Management System for Minicomputers. 114
A SNOBOL 4 Program to Clean Up FORTRAN Source. 102
A Survey of Interactive Graphics Software. 11
Chess Skill in Man and Machine. 10
Computer-Based Information Retrieval Services, with Special Reference to their Availability in Australia. 78
Computer Methods in Operations Research. 114
Computer Programs for Building Perspectives, Evaluation Report. 52
Computers and Communications: Implications for Education. 152
Computer Science and Scientific Computing. 22
Computer Science D.Sc., Ph.D. and Masters Theses Submitted at Australian Universities. 37
Computers in Society. 77
CONFUCIUS: A Structural Concept Learning System. 138
Data Analysis for Data Base Design. 122
Data Base Organisation for Data Management. 27
DATA BASE PROCESSING: Fundamentals, Modelling, Applications. 137
Data Structures and Programming Techniques. 74
Data Structures, Computer Graphics and Pattern Recognition. 75
Distributed Processing. Infotech State of the Art Report. 75
Effective Structuring of COBOL Programs. 43
8th World Computer Congress. 50
Every Object is a System A Cognitive Basis for System Description. 75
Forthcoming National and International Events. 40, 79, 119, 159
Fortran Programming: A Supplement for Calculus Courses. 76
Interactive Systems. LNCS Vol. 49. 160
Is Disciplined Programming Transferable, and is it Insightful? 87
Mathematical Foundations of Computer Science. 86
Matrix Eigensystem Routines — EISPACK Guide Extension. 77
On Determining the Prime Implicants of a Boolean Function without Recourse to its Minterm Form. 153
On Structuring Operating Systems with Monitors. 23
Port Management in the CYBER76-CSIRONET Interface. 98
Simula 67 Through Run-Time Structure. 60
Software Engineering. 144
Software Physics and Program Analysis. 82
Stylistics in Languages with Compound Statements. 58
Teaching Systems Concepts Using a Hospital Admissions Model. 53
The Australian Universities Computer Science Seminar, 1978 (Editorial). 2
Topological Design of a Small Resource Sharing Network. 142
